Regional Mfg. Specialists Inc.

124.5% Three-Year Growth

REVENUE: **\$8.3 million** EMPLOYEES: **36**

FOUNDED: **1992** **Concord, NH**

What it does: Designs and manufactures custom transformers, inductors and coils for OEMs.

Why it's growing: The company's digital imaging process allows it to test 100 percent of its products at every step of the manufacturing process, ensuring each product is identical in quality.

What's noteworthy: In 2006, Regional Manufacturing moved from a 15,000 to 40,000 square foot building.

Company Profile Regional Mfg. Specialists has redefined the transformer industry with its unique equipment, infrastructure, business processes, and staff, to deliver quality measured at negligible PPM defect levels, customer inquiry response time measured in hours, and extremely fast, flexible, and reliable order processing. The company also provides expert engineering assistance and rapid prototype and sample supply service.

Regional's custom products include transformers for equipment of many types, and for power ranges from very low up to 75KVA. The Company also makes a broad range of inductors and coils, and often provides additional component sub-assembly or "box-build" services that can include void-free vacuum potting.

Regional achieves best-in-class domestic manufacturing efficiency with the most advanced equipment that has been custom augmented for higher speed and quality output, minimized operator time, and rapid changeover through centrally down-loaded job programming. The company also collaborates closely with multiple Asian contractors for high labor-content, high volume components.

Inc. 5000 **About the Inc. 5,000** The Inc. 5,000 makes its debut this year. It's a tenfold expansion of the 25-year-old Inc. 500, *Inc.* magazine's annual ranking of the fastest-growing privately held companies in the United States. The Inc. 5,000 is the most complete portrait of the universe of growing private companies ever assembled. This extension of the Inc. 500 brand shines a spotlight on thousands of hitherto little-known innovators in industries ranging from manufacturing and construction to consumer products to software. The Inc. 5,000 profiles are the result of screening and interviews by dozens of reporters and writers for Inc.com, the website for *Inc.* magazine.
